

Mini 1

Durable **416 stainless steel spool** and **patented seal-spacer** design assure optimum sealing and long service life.

Balanced spool design provides for true multipurpose capability allowing the use of dual pressures, vacuum or other non-standard piping of the ports.

Self lubricating Buna-N seals coated with a Teflon[®] based grease allow operation in minimal or even non-lube service.

Teflon[®] is a registered trademark of the DuPont Corporation.
